

DepthMatic Mark II

Portable Electronic Depth Gage

The new Fowler/Bowers DepthMatic, a fast slide-action depth gage, gives rapid, accurate and easy to read depth measurements. It can be set to display either .00005" (.001mm) or .0005" (.01mm) resolution depending on work piece tolerance.

A variety of measurements other than simple length or depth can be made with the use of optional changeable contact points for right angle and groove measuring.

Depthmatic Features:

- Patented Sylvac Measuring System
- Two preset memories
- Resolution to 0.00005" (0.001mm)
- Tolerance limit mode
- Min/Max/tir mode.
- Direct RS232C output
- Includes 1/2", 1", 2" and two 4" rods
